

# HARISHKUMAR A

## FULL-STACK AI ENGINEER

harishkumarhk8604@gmail.com | +91 6379011300 | Madurai, Tamil Nadu.

---

### SUMMARY

Passionate Full-Stack Developer with 2.5+ years of experience at **WizzGeeks** with experience in designing and developing responsive, scalable web applications. Proficient in **React**, **Node.js**, **Express**, and building **RESTful** APIs with **MongoDB**. Hands-on experience with **AWS (EC2, S3)**, **server management**, and application deployment using **Nginx** and **Docker**. Familiar with **CI/CD pipelines**, **Git workflows**, and performance optimization. Strong advocate of clean, maintainable code, effective collaboration in **Agile environments**, and continuous learning. Experienced in **mentoring junior developers** and contributing to team success.

---

### KEY COMPETENCIES

- React.js
  - Node.js, Express.js
  - Version Control (Git)
  - RAG Methods
  - API Development & Integration
  - Database Management.
  - Server Management.
  - AI Agent Development
- 

### PROFESSIONAL EXPERIENCE

#### GUVI/HCL - Zen Class

##### Frontend Developer

- Built responsive and accessible UIs using **React**, **Material-UI (MUI)**, and **Bootstrap**, ensuring cross-device compatibility and a consistent design system.
- Integrated dynamic front-end components with **RESTful APIs**, collaborating closely with backend developers and UI designers to deliver seamless functionality and design alignment.
- Collaborated in an Agile team using Git for version control, contributing to **stand-ups** and sprint planning for effective team coordination

#### Bluefunda

##### Full Stack Developer

- Developed scalable backend services using **Express js**, implementing RESTful APIs and leveraging KrakenD API Gateway for efficient aggregation and routing.
- Built responsive web interfaces using **React**, integrating real-time features with NATS messaging for seamless user interactions.
- Implemented **authentication and authorization** with **Keycloak**, ensuring secure user access management across applications.

- Coordinated with clients and cross-functional teams (SAP developers, Figma designers) in an Agile environment, utilizing Jira for task management, ensuring alignment on project goals, regular feedback loops, and timely deliverables.
- Designed and maintained a **CI/CD pipeline** with **Docker** and GitHub Actions, automating build, test, and deployment workflows to production servers.
- Created a fast, **SEO-optimized** promotional site using Hugo CMS, enabling quick content updates and lightweight static hosting.
- Integrated MinIO as a cost-effective S3 alternative with **MCP**, automating storage management through prompts.

## Delhi Public School

### Full Stack Developer

- Developed a full-stack web application using **React** (frontend) and **Express js** (backend) with role-based access for Admin, Principal, Teacher, and Student.
  - Implemented **AI-driven** question generation, online test portal, and automated AI evaluation system supporting 3,000+ concurrent users.
  - Deployed the platform with scalable architecture, ensuring secure API integration, performance optimization, and **high availability** in production.
  - **Led and coordinated** a cross-functional team, managing task distribution, code reviews, and delivery timelines to ensure successful project execution.
- 

## AI ENGINEERING PROJECTS

### Telephony / Voice AI Agent – Pipecat (Python)

- Built and deployed a production Voice AI agent using Pipecat (Python), enabling real-time STT → LLM → TTS streaming for automated customer-service calls with low-latency conversational responses.

### Real-Time Interview AI Agent – LiveKit

- Engineered a real-time conversational interview agent on LiveKit with low-latency WebRTC audio, integrating OpenAI LLMs and STT / TTS provider for speech, supporting 200 concurrent live interviews.

### Natural-Language-to-SQL Database Agent – LLM Tool Calling

- Built an LLM-powered NL-to-SQL agent using function calling, schema-aware prompting, and query validation to translate natural-language requests into executable SQL, improving data accessibility and reducing manual analytics effort.

### LLM-Powered Assessment Platform – AI Question Gen + Auto-Grading

- Engineered an LLM-powered assessment platform using AI-driven question generation and automated grading, implementing RBAC (Admin, Principal, Teacher, Student) and scalable architecture to support 3,000+ concurrent users with high availability.

### MCP Storage Automation – Model Context Protocol + MinIO

- Built an MCP (Model Context Protocol) integration exposing MinIO object storage as agent-callable tools, enabling prompt-driven file management and storage automation while providing a cost-effective alternative to Amazon S3, reducing storage costs by ~60%.

## EDUCATION

### **B.Tech Information Technology**

(2020 - 2024)

K S R Institute for Engg & Tech, Namakal.

CGPA : 8.17

### **Higher Secondary**

(2019 - 2020)

Kamarajar matric Hr sec school sholavandan, Madurai

69.33%
